

Project Name	ebay							
Executed by	Priyanka							
Execution date	16-11-2024							
Test case ID	Testing Type	Test Description	Pre-requisite	Steps to execute	Test Data	Expected Result	Actual Result	Status
TC_001	Functionality testing	Verify that user is able to sign up with valid details (username, email,password)	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2. Go to registration option 3. Enter your valid details 4. Enter create personal account	Username Email ID Password	User should be able to register the account	User is able to register the account	Pass
TC_002	Functionality testing	Verify that the password meets the required criteria (e.g., minimum length,uppercase, special characters,)	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2. Go to registration option 3. Enter your strong password 4. Enter create personal account	Password	User should be able to register the account	User is able to register the account	Pass
TC_003	Functionality testing	Verify that user receives a confirmation email after signing up.	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2. Go to registration option 3. Enter your valid password 4. Enter create personal account 5. check the email on your registered ac count	Null	user receives a confirmation email after signing up on regis terd account	user receives a confirmation email after signing up on re gisterd account	Pass
TC_004	Functionality testing	Verify that a user can log in after successfully signing up	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2. Go to sign in option 3. Enter your email account 4. Enter your password 5. Enter the Sign in	Email Id Password	User should be able to login sucessfully after registered	User is able to login	Pass
TC_005	Functionality testing	Verify error message when trying to sign up with an already registered email.	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2. Go to registration option 3. Enter already registered email 4. create a personal account	Email ID	User should get the error msg of already registered email	User should get the error msg of already registered email	Pass
TC_006	Functionality testing	Verify that an error message appears if mandatory fields (username, email, password) are left blank.	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2. Go to registration option 3. Left a field blank 4. Enter create personal account 5. check the error msg	Email id	User should get the error msg of manadatory when left a field	User is get the error msg of manadatory when left a field	Pass
TC_007	Functionality testing	Verify that a user can log in with valid credentials	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.go to sig in 3. enter valid details 4. Enter sign in	Email ID Password	User should be able to login with valid details	User is able to login with valid details	Pass
TC_008	Functionality testing	Verify that the user is redirected to the correct dashboard/home page after logging in	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your valid details	Email Id Password	User should redirected to the correct dashboard/home page after logging in	Verify that the user is redirected to the correct dashboard/home page after logging in	Pass
TC_009	Functionality testing	Verify error message for login with valid username and invalid password	OS - Windows 10 Browser - Chrome internet connectivity	1. Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your valid details	Email Id Password	User should be get the error msg for invalid password	User gets the error password for invalid password	Pass
TC_010	Functionality testing	Verify error message for login with both invalid username and password	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3.Enter invalid details	Email id Password	User should be get the error msg for invalid details	User gets the error password for invalid details	Pass
TC_011	Functionality testing	Verify login when the password field is left blank	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3.left a field blank	null	User should get manadatory msg	User get the error msg	Pass
TC_012	Functionality testing	Verify that a logged-in user can successfully log out by clicking the logout button	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to log out option	null	user should able to logout	user is able to log out	Pass
TC_013	Functionality testing	Verify that after logging out, the user cannot access any pages without logging in again.	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to log out option 3. Try to access page without login	null	after logout user should not able to access any page without login	after logout user is not able to access any page without login	Pass

TC_014	Functionality testing	Verify that a user can search for an item using valid keywords	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your details 4.search the item using valid keyword	null	user should able search for an item using valid keywords	user can able search for an item using valid keywords	Pass
TC_015	Functionality testing	Verify that the search results are relevant to the entered search keyword.	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your details 4.search the item using valid keyword	null	search results are relevant to the entered search keyword.	search results are relevant to the entered search keyword.	Pass
TC_016	Functionality testing	Verify that the user can filter search results based on available categories.	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your details 4.filter the product	null	user should filter search results based on available categories.	Verify that the user can filter search results based on available categories.	Pass
TC_017	Functionality testing	Verify that the search suggestions are displayed when the user types in the search bar	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your details 4.Search the product	null	search suggestions should displayed when the user types in the search bar	Verify that the search suggestions are displayed when the user types in the search bar	Pass
TC_018	Functionality testing	Verify that an appropriate message (e.g., "No results found") is displayed when searching for a non-existent item.	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your details 4.Search the product	null	an appropriate message (e.g., "No results found") should displayed when searching for a non-existent item.	an appropriate message (e.g., "No results found") is displayed when searching for a non-existent item.	Pass
TC_020	Functionality testing	Verify that the search works for case-insensitive keywords (e.g., searching for "Book" and "book" gives the same results).	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your details 4.Search the product	null	user should get the same result for both the search	user get same result for both search	Pass
TC_021	Functionality testing	Verify that user is able to add the product in the cart	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to sig in 3. Enter your details 4.Search the product	null	user should able to add the product in the cart	user is able to add the product in the cart	Pass
TC_022	Functionality testing	Verify that user is able to add the product in wishlist	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to home page 3. select the product 4.add to it in cart	null	user should able to add the product in wishlist	Verify that user is able to add the product in wishlist	Pass
TC_023	Functionality testing	Verify that user can order cash on delivery	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to home page 3. select the product 4.click the buy now and enter details	null	user should able to order cash on delivery	user is not able to order cash on delivery	Fail
TC_024	Functionality testing	Verify that user is able to remove the product from the wishlist	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to home page 3.Got to wishlist 4.remove the product	null	user should able to remove the product from wishlist	user is able to remove the product from wishlist	Pass
TC_025	Functionality testing	Verify that customers can view their order history.	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to home page 3.Go to my order 4.click on order history	null	user should be able to see history of orders	user is not able to see history of order	Fail
TC_026	Functionality testing	Verify that customers can cancel their order	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to home page 3.Go to my order 4.click on cancel the order	null	user should able to cancel their order	user is not able to cancel their product	Fail
TC_027	Functionality testing	Verify that customer can track their order	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.Go to home page 3.Go to my order 4.click on order tracking	null	user should be able to track the product	user is not able to track the order	Fail
TC_028	Functionality testing	Verify that user can update their profile	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.go to homepage 3. go to my profile 4. update the profile	null	user should be able to update their profile	user is not able to update their profile	Fail
TC_029	UI/UX	Verify that all navigation links work correctly	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2.go to homepage 3. visit all the links	null	All navigation links lead to the correct pages without errors	All navigation links lead to the correct pages without errors	Pass
TC_030	Compatibility	Checking Browser compatibility by testing on different browsers	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2 verify this link on different web browser	null	website should be work properly on all browser	website is working properly on all browser	pass
TC_031	UI/UX	check the responsiveness of the website on different devices	OS - Windows 10 Browser - Chrome internet connectivity	1: open the website on your device (tablet, phone) step2: click on each links	null	The layout adjusts properly and remains usable on all devices.	website is responsive	pass
TC_032	UI/UX	Check the search bar is available on page	OS - Windows 10 Browser - Chrome internet connectivity	1.Visit the URL : <a href="https://www.ebay.com/">https://www.ebay.com/</a> 2 verify the search bar is available	null	there should a search on home page for search the task	there is a search on home page for search the task	pass
